

HONEYTRAP (\$HONEY)

The Official Meme Whitepaper

THIS IS A TRAP.

Read responsibly. Participate irresponsibly.

1. Abstract (For People Who Pretend to Read)

HONEYTRAP is a **pure meme experiment** designed to observe human behavior when liquidity, attention, and temptation collide.

This project does **not** promise: - Utility - Roadmaps - Partnerships - Financial advice

It **does** promise: - Memes - Transparency about risk - A live social experiment - Sticky outcomes

If you are looking for fundamentals, you are already lost.

2. The Problem (a.k.a. Why This Exists)

Every cycle, the same pattern repeats:

1. Shiny meme appears 
2. People say "I'll just put a little"
3. Liquidity grows
4. Reality hits
5. Timeline fills with cope

The problem is **not scams**.

The problem is **denial**.

HONEYTRAP exists to remove the illusion and present the meme **exactly as it is**.

No pretending. No fake builders. No "long-term vision" tweets.

3. The Solution (Spoiler: It's Not a Solution)

The solution is **honesty**.

HONEYTRAP openly declares itself as: - A meme - A trap - A behavioral experiment

Participants are not users. They are **subjects**.

The market becomes the message.

4. How It Works

- A prediction market is launched
- Target liquidity: **15 SOL**
- Attention drives participation
- Social consensus decides momentum

There are no hidden mechanics. The only variable is **human behavior**.

5. Tokenomics (The Sweet Stuff)

Token Name: HONEYTRAP

Symbol: \$HONEY

Distribution

- 100% Meme
- 0% VC
- 0% Insider advantage
- 100% vibes

Liquidity is the feature. Volatility is the outcome.

6. Roadmap (🍯)

Phase 1: Launch

- Deploy market
- Post memes
- Watch chart

Phase 2: Attention

- Bees arrive
- Honey spreads
- Trap tightens

Phase 3: Acceptance

- Some win
- Some lose
- Everyone learns (maybe)

There is no Phase 4.

7. Governance (Also a Meme)

There is no governance.

The loudest voice is liquidity. The strongest vote is attention.

8. Risks (Read This Part)

- You can lose everything
- You might feel smart before you feel dumb
- Charts do not care about you
- Memes move faster than logic

If this scares you — **good**.

9. Who Is This For?

HONEYTRAP is for: - Degens with self-awareness - Traders who understand risk - Meme historians - People tired of fake narratives

It is NOT for: - People seeking guarantees - People who blame others - People who skip disclaimers

10. Final Words

This is not financial advice. This is not a protocol. This is not a movement.

This is a mirror.

If you see yourself in it — welcome.

 **THIS IS A TRAP.**
